Why Laser-Cut Kits?

Laser-cut kits are a perfect way to improve your business! Here's why:

√ Increased sales

Both your existing customers - and the new customers that you will attract - will appreciate the ease and tremendous time savings in which they can complete the laser-cut kits. You can augment your kit sales with notions, thread, fabric and accessories, and hold both skill-building classes, such as appliqué and sewing/stitching, and project-oriented classes. Students won't spend so much class time tracing and cutting fabric allowing more quality time for teaching and selling. Plus, if you sell sewing machines, this is the perfect opportunity to showcase specialty and decorative stitches.

√ Repeat sales

Because laser-cut kits are so fast and simple to put together, customers feel a great sense of accomplishment and will come back for more kits. Also, many of our kits are part of a collection or series that can be structured as a "Block of the Month" club or program.

√ Fast start-up and lower investment

To make your own kits, you not only have to invest the time and effort to make them, but you also need to purchase fabric by the bolt whether you really need that much or not. Our laser-cut kits are all pre-packaged and ready to sell! And, following the old adage that "samples sell", you can create a sample from a laser-cut kit in no time at all!

Kits available using patterns from these leading designers:

Bareroots
Jeri Kelly
McKenna Ryan
P3 Designs
StoryQuilts.com, Inc.
Toni Whitney
Zebra Patterns

... and more!
