

Using *The Thread Stem*

On a Horizontal Spool Pin

When using a horizontal spool pin (see picture on left):

- Place *The Thread Stem* onto the pin and then use the thread holder that slides onto the pin and is normally provided with your machine to secure it in place*.
- Place the large spool in the back of the machine so that the thread travels straight up from the spool to *The Thread Stem*.
- Feed the thread through the hole in *The Thread Stem* and through the rest of the machine as normal.

On a Vertical Spool Pin

When using a vertical spool pin (see picture on left):

- Place *The Thread Stem* onto the pin. Optionally place a small spool of thread over it on the pin to help secure it in place*.
- Place the large spool to the side of the machine so that the thread travels straight up from the spool to *The Thread Stem*.
- Feed the thread through the hole in *The Thread Stem* and through the rest of the machine as normal.

*As an alternative, a clothespin can often be used to secure *The Thread Stem*.
