# *Grip-Lite™ Side Clamps For Longarm / Midarm Machine Quilting*

The Grip-Lite Side Clamp is the perfect solution for keeping your quilts securely mounted on your quilting machine!

## Features and Advantages

- ✓ Lightweight (4 oz including Velcro™) so it won't pull your mounted quilt down causing distortion
- ✓ Securely grips quilt, yet you can add, adjust or remove it easily with one hand
- ✓ Includes 6-foot double-sided Velcro strip with short elastic strip for fast and easy attachment to any frame
- ✓ Clamp opens enough for gripping a single fabric layer or multiple layers with batting

## How Can Something So Light Work So Well?

The Grip-Lite clamp's secret is its jaws. The jaws are 6 inches wide providing a more uniform grip across the mounted quilt avoiding distortion.

And, each jaw has a thin, non-slip surface that maintains a firm grip and won't harm the fabric.

## Tension Testing ... An Added Bonus!

Testing your machine's tension has never been easier! You can wrap the Grip-Lite clamp's double-sided Velcro strip to create a short grip on a piece of test fabric and batting. No need to test on the actual quilt itself or take a chance by not calibrating the tension first.

## Ordering Information

The Grip-Lite Side Clamp is available as a set of two clamps – no assembly required!

To order or for more information, please call us at 760-738-9677, or email us at [orders@quiltersparadiseesc.com](mailto:orders@quiltersparadiseesc.com).
