

The CutRite™ Bind Up tool is used to join the two ends of your quilt's binding.

Instructions

Attach your binding, as you normally do, until there are approximately 10 inches remaining with 5 inches to the left of the finishing point and 5 inches to the right of the finishing point.

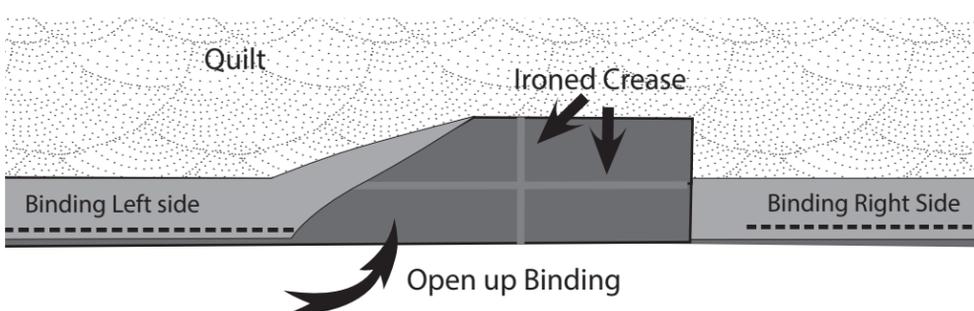

Step 1

Take both unsewn ends of the binding and fold each side back onto itself, ensuring that the folds touch each other in the center. Press with an iron.

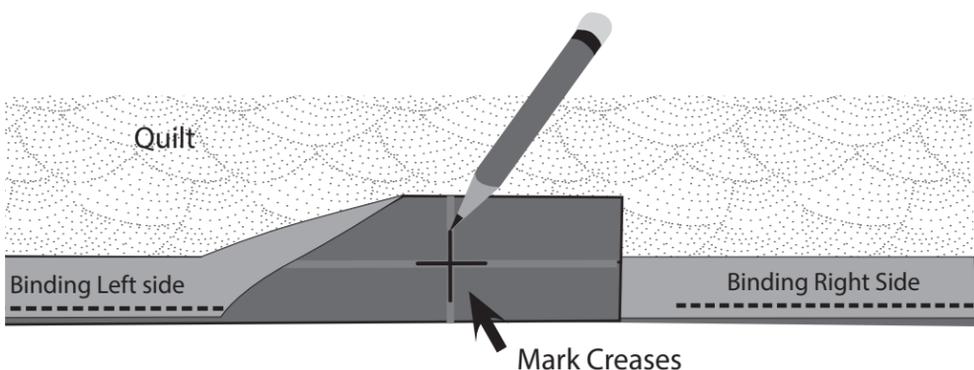

Step 2

Open the left binding end so that the wrong side is face up.

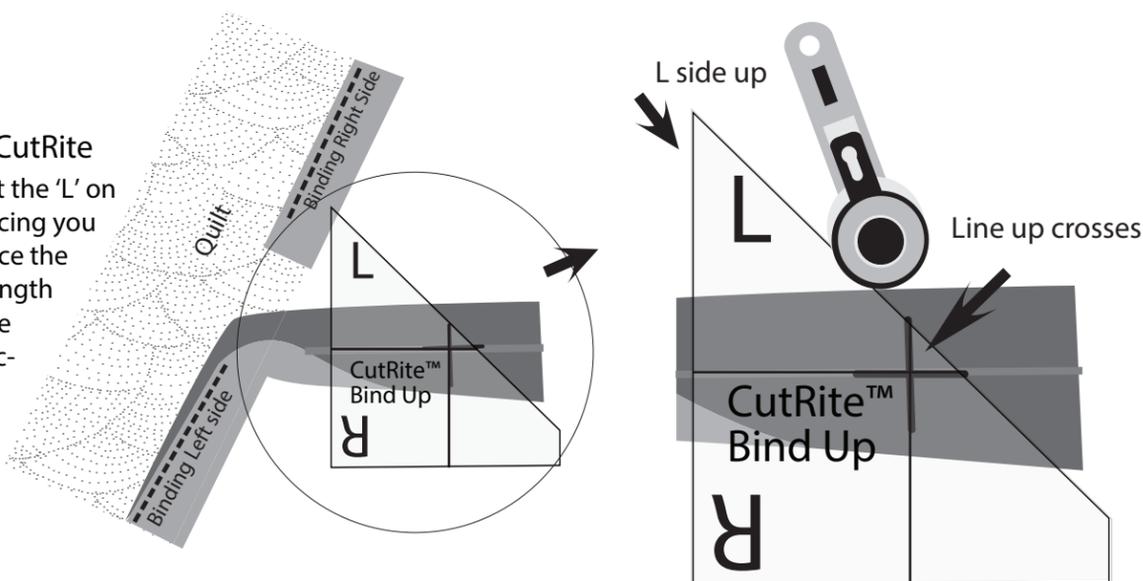

Step 3

Mark the lengthwise and widthwise folds with a marking tool such as a pencil. Repeat for both sides of binding.

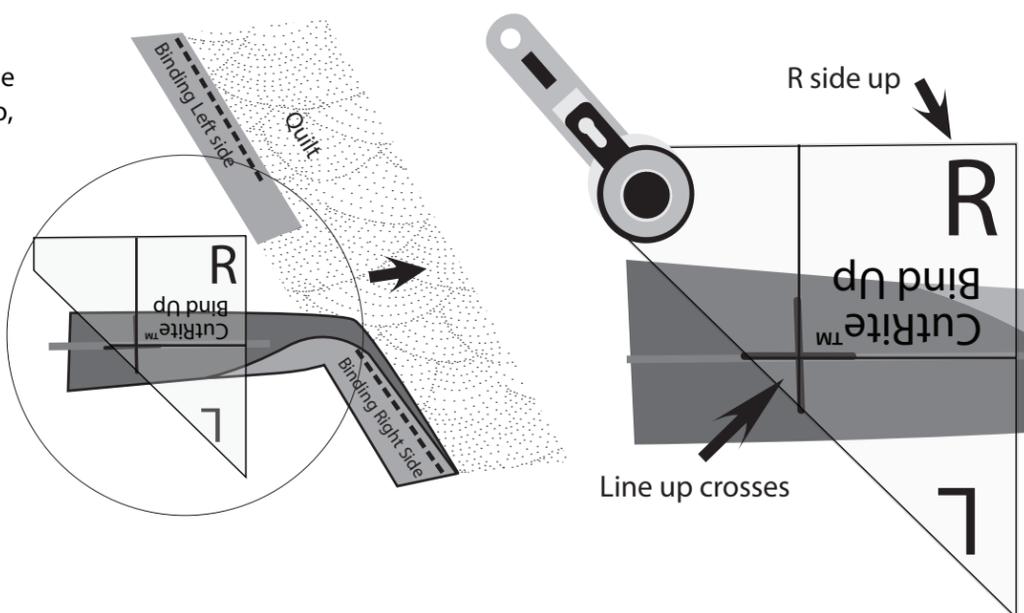

Step 4

Position the CutRite Bind Up tool so that the 'L' on the tool is face up, facing you in the upper left. Place the intersection of the length and width lines of the tool over the intersection of the crease. Then cut along the diagonal.

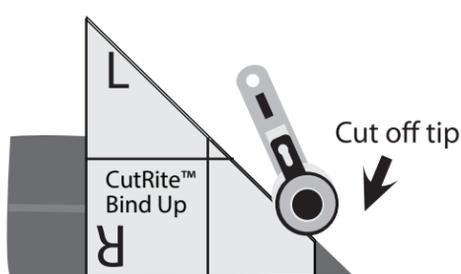

Step 5

Repeat Step 4 for the right binding strip. To do so, rotate the CutRite Bind Up tool so that the 'R' is face up, facing you in the upper right.

Step 6

Align the CutRite Bind Up tool evenly with the bottom of the cut binding and then cut off the tip on both the right and left binding.

Step 7

Put the right sides together from the left and right binding strips along the diagonal edge. Sew the left and the right binding strips together using a 1/4-inch seam allowance and attach to quilt.
